

Healtheon – Capability Based Hiring Guide

Location: Hyderabad (On-site)

About Healtheon

Healtheon is building a Neuro-symbolic Agentic AI Mesh for Healthcare Revenue Cycle Management (RCM). We hire for capability, ownership, excellence and research depth.

Principal AI Engineer / AI Architect

No. of Openings: 1

Lead the design of Healtheon's Agentic AI platform. Build multi-agent systems, RAG, memory, orchestration, and guardrails.

- **Experience:** 3+ years building production AI systems, or equivalent demonstrated expertise through open-source contributions, research, startups, or production deployments.
- **Skills:** Python, LangGraph, CrewAI, OpenAI SDK, AWS/Azure/GCP, Kubernetes, Databricks, Snowflake, Docker.
- **Preferred:** Neuro-symbolic AI, CUDA, RL, Healthcare AI, FHIR, HIPAA.
- **Education:** MS/PhD preferred.
- **Success:** Scalable production AI platform, mentoring, architecture quality.

Senior AI Research Scientist

No. of Openings: 1

Translate cutting-edge AI research into production. Research LLMs, reasoning, evaluation, and guardrails.

- **Experience:** 2+ years building production AI systems, or equivalent demonstrated expertise through open-source contributions, research, startups, or production deployments.
- **Skills:** PyTorch, Transformers, RLHF, Knowledge Graphs, Python, CUDA.
- **Preferred:** Experience with LLM evaluation, reasoning systems, and agentic AI.
- **Education:** MS/PhD in AI, Computer Science, Mathematics, or Statistics.
- **Success:** Deployable research and measurable model improvements.

Principal Platform & Infrastructure Engineer

No. of Openings: 1

Build infrastructure for autonomous AI agents. Own cloud, Kubernetes, observability, GPU infrastructure, and CI/CD.

- **Experience:** 3+ years building production AI systems, or equivalent demonstrated expertise through open-source contributions, research, startups, or production deployments.
- **Skills:** AWS/Azure/GCP, Docker, Kubernetes, Kafka, Redis, Terraform.
- **Preferred:** Ray, vLLM, KServe, inference optimization.
- **Education:** Bachelor's or Master's in Computer Science or related field.
- **Success:** Reliability, scalability, and cost optimization.

Junior Full Stack AI Engineer

No. of Openings: 8

Develop enterprise AI applications across backend, frontend, APIs, agent integration, and healthcare workflows.

- **Experience:** 0-2 years building production AI systems, or equivalent demonstrated expertise through open-source contributions, research, startups, or production deployments.
- **Skills:** Python, FastAPI, React, Next.js, PostgreSQL, REST APIs.
- **Preferred:** LangGraph, CrewAI, OpenAI SDK, FHIR.
- **Education:** Bachelor's or Master's in Computer Science or related field.
- **Success:** Production features, performance, and customer adoption.

Senior Full Stack AI Engineer

No. of Openings: 4

Develop enterprise AI applications across backend, frontend, APIs, agent integration, and healthcare workflows.

- **Experience:** 4+ years building production AI systems, or equivalent demonstrated expertise through open-source contributions, research, startups, or production deployments.
- **Skills:** Python, FastAPI, React, Next.js, PostgreSQL, REST APIs.
- **Preferred:** LangGraph, CrewAI, OpenAI SDK, FHIR.
- **Education:** Bachelor's or Master's in Computer Science or related field.
- **Success:** Production features, performance, and customer adoption

Talent Acquisition Specialist / AI Recruiter

No. of Openings: 1

End-to-end hiring for technical and business roles. Your mission is to identify exceptional talent before everyone else does and create an outstanding candidate experience.

- **Experience:** 2+ years in technology recruitment or equivalent demonstrated success hiring engineers for startups.
- **Skills:** LinkedIn Recruiter, Github Sourcing, Boolean Search, Applicant Tracking Systems (Ashby, Greenhouse, Lever or similar), Excellent communication, Strong stakeholder management, Data-driven recruitment
- **Preferred:** Startup & AI hiring
- **Success:** Quality hires

UI/UX Designer

No. of Openings: 1

Design intuitive, AI-first user experiences for web applications, dashboards, and agentic AI workflows, translating complex concepts into simple, user-centric interfaces.

- **Experience:** 3+ years in UI/UX design for SaaS, AI, healthcare, or enterprise products, or equivalent portfolio demonstrating strong design capabilities.
- **Skills:** Figma, Wireframing, Prototyping, Design Systems, User Research, Information Architecture, Interaction Design, Responsive Design.

- **Preferred:** Experience designing AI/LLM applications, conversational interfaces, healthcare products, and familiarity with usability testing.
- **Education:** Bachelor's or Master's in Design, HCI, Computer Science, or a related field.
- **Success:** Deliver intuitive, scalable, and visually compelling user experiences that improve usability, engagement, and product adoption.
